

Chairs of excellence

- * **AWESOME**: Held by **Anaïs Barasinski**, this chair focuses on exploiting the possibilities offered by composite materials. Its activities are based on modeling, engineering, simulation and data analysis in order to propose solutions for advanced applications.
- * **BOIS**: the main mission of **Eduardo Robles'** WOOD Chair is to promote the use of biomass from forestry and agricultural activities in the Landes region.
- * **ECOTOX**: Held by **Séverine Le Faucheur**, this chair focuses on the development of fundamental knowledge and practical tools to improve the assessment of continental water quality
- * **MANTA**: headed by **Susana Fernandes**, this chair explores marine compounds and materials, with a scientific approach focused on biomimetism, in order to address societal problems related to human health and the degradation of the marine environment
- * **Shih-Yuan LIU**
- * **Emilio PALOMARES**
- * **Ryan ROGER**
